

## PRACTICA 1 U3

**EXPERT INSTALLLLLLL**

Elegimos el lenguaje y configuramos el teclado

!!! Select your location

The selected location will be used to set your time zone and also for example to help select the system locale. Normally this should be the country where you live.

This is a shortlist of locations based on the language you selected. Choose "other" if your location is not listed.

Country, territory or area:

Antigua and Barbuda

Australia

Botswana

Canada

Hong Kong

India

Ireland

Israel

New Zealand

Nigeria

Philippines

Seychelles

Singapore

South Africa

United Kingdom

United States

Zambia

Zimbabwe

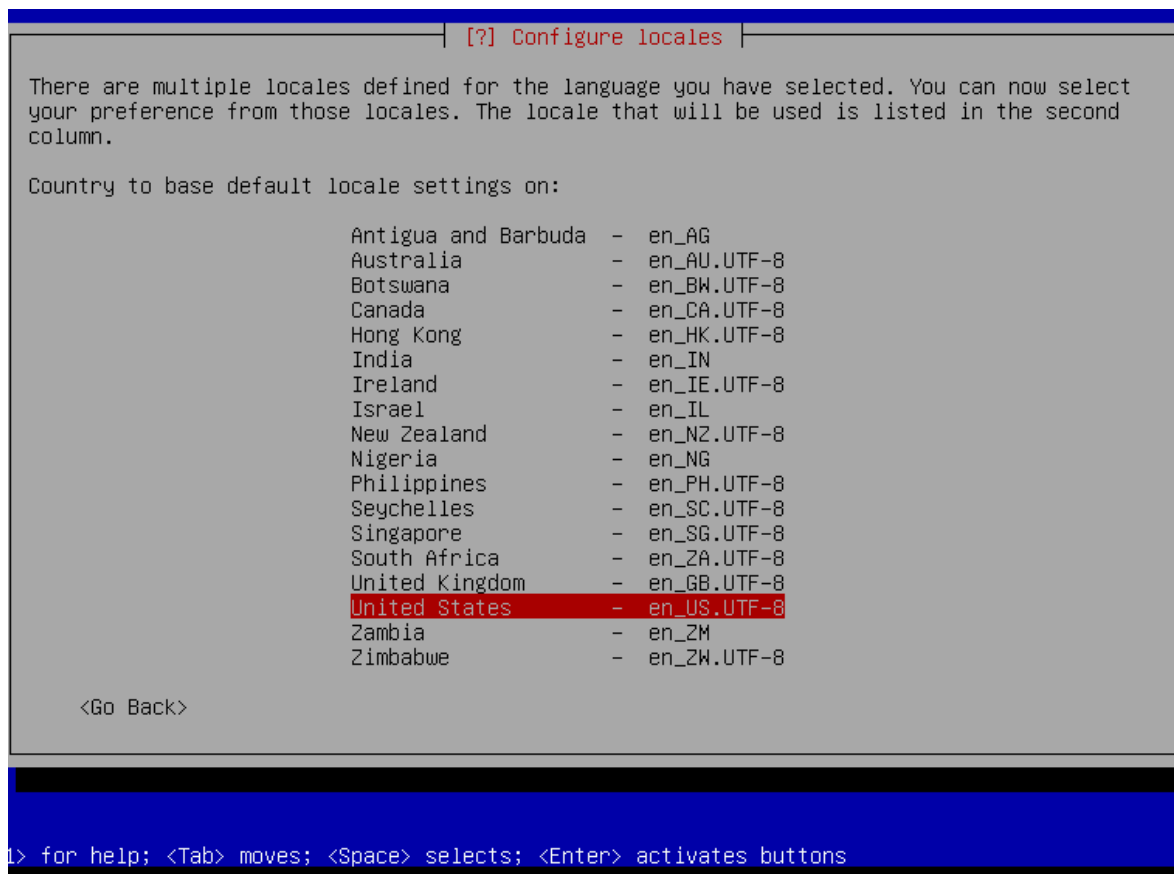

other

<Go Back>

Go Back

Other

Enter

Based on your previous choices, the default locale currently selected for the installed system is 'en\_US.UTF-8'.

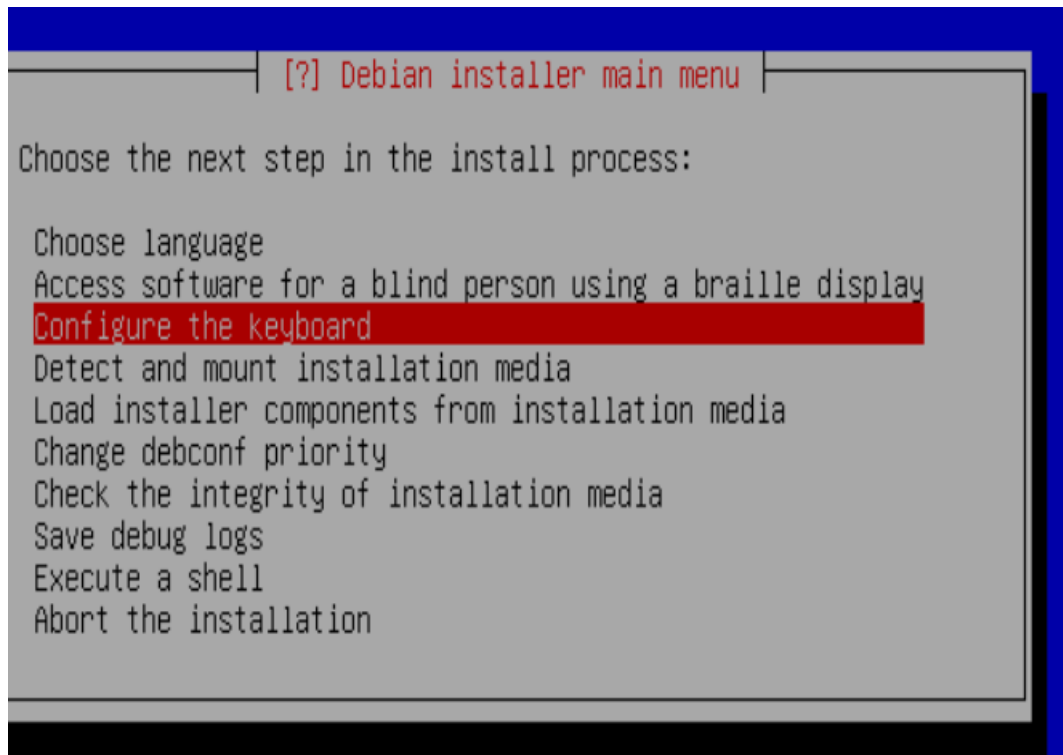

If you wish to use a different default or to also have other locales available, you may choose additional locales to be installed. If you are unsure it is best to just use the selected default.

Additional locales:

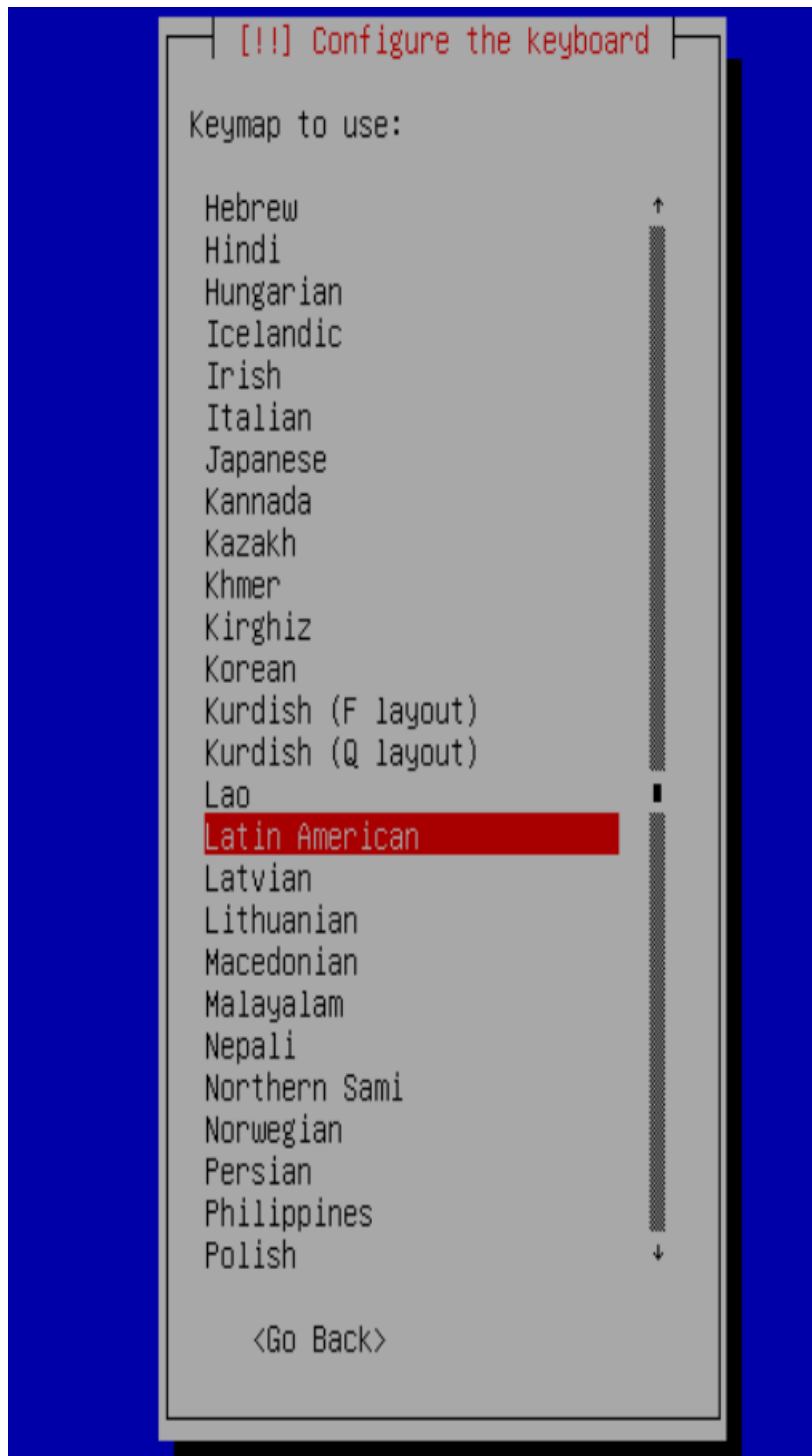

- ☐ en\_HK.UTF-8
- ☐ en\_HK
- ☐ en\_IE.UTF-8
- ☐ en\_IE
- ☐ en\_IE@euro
- ☐ en\_IL
- ☐ en\_IN
- ☐ en\_NG
- ☐ en\_NZ.UTF-8
- ☐ en\_NZ
- ☐ en\_PH.UTF-8
- ☐ en\_PH
- ☐ en\_SC.UTF-8
- ☐ en\_SG.UTF-8
- ☐ en\_SG
- ☐ en\_US
- ☐ en\_US.ISO-8859-15
- ☐ en\_ZA.UTF-8
- ☐ en\_ZA

All components of the installer needed to complete the install will be loaded automatically and are not listed here. Some other (optional) installer components are shown below. They are probably not necessary, but may be interesting to some users.

Note that if you select a component that requires others, those components will also be loaded.

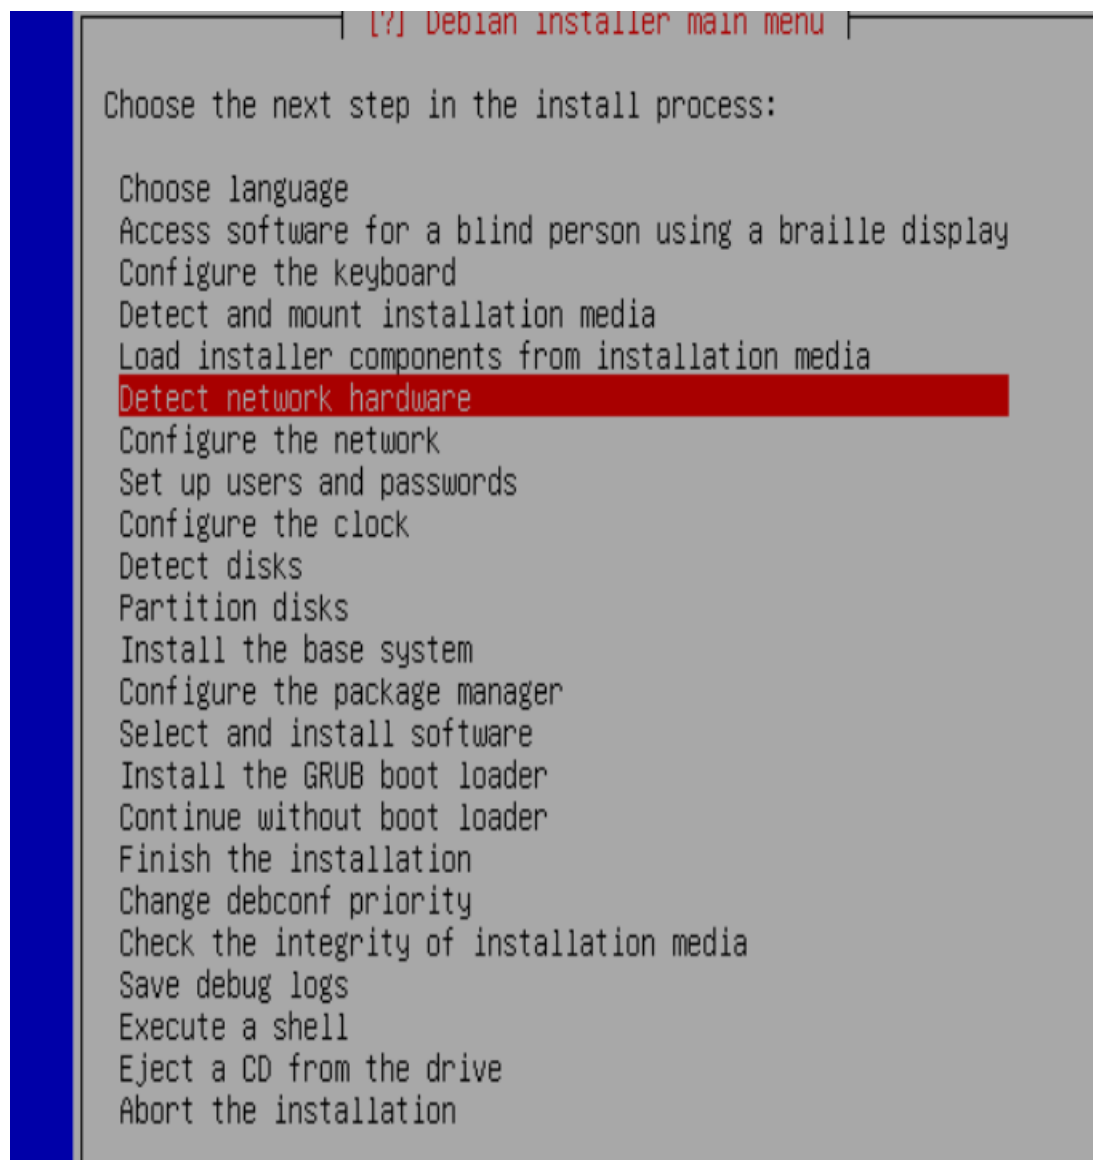

Installer components to load:

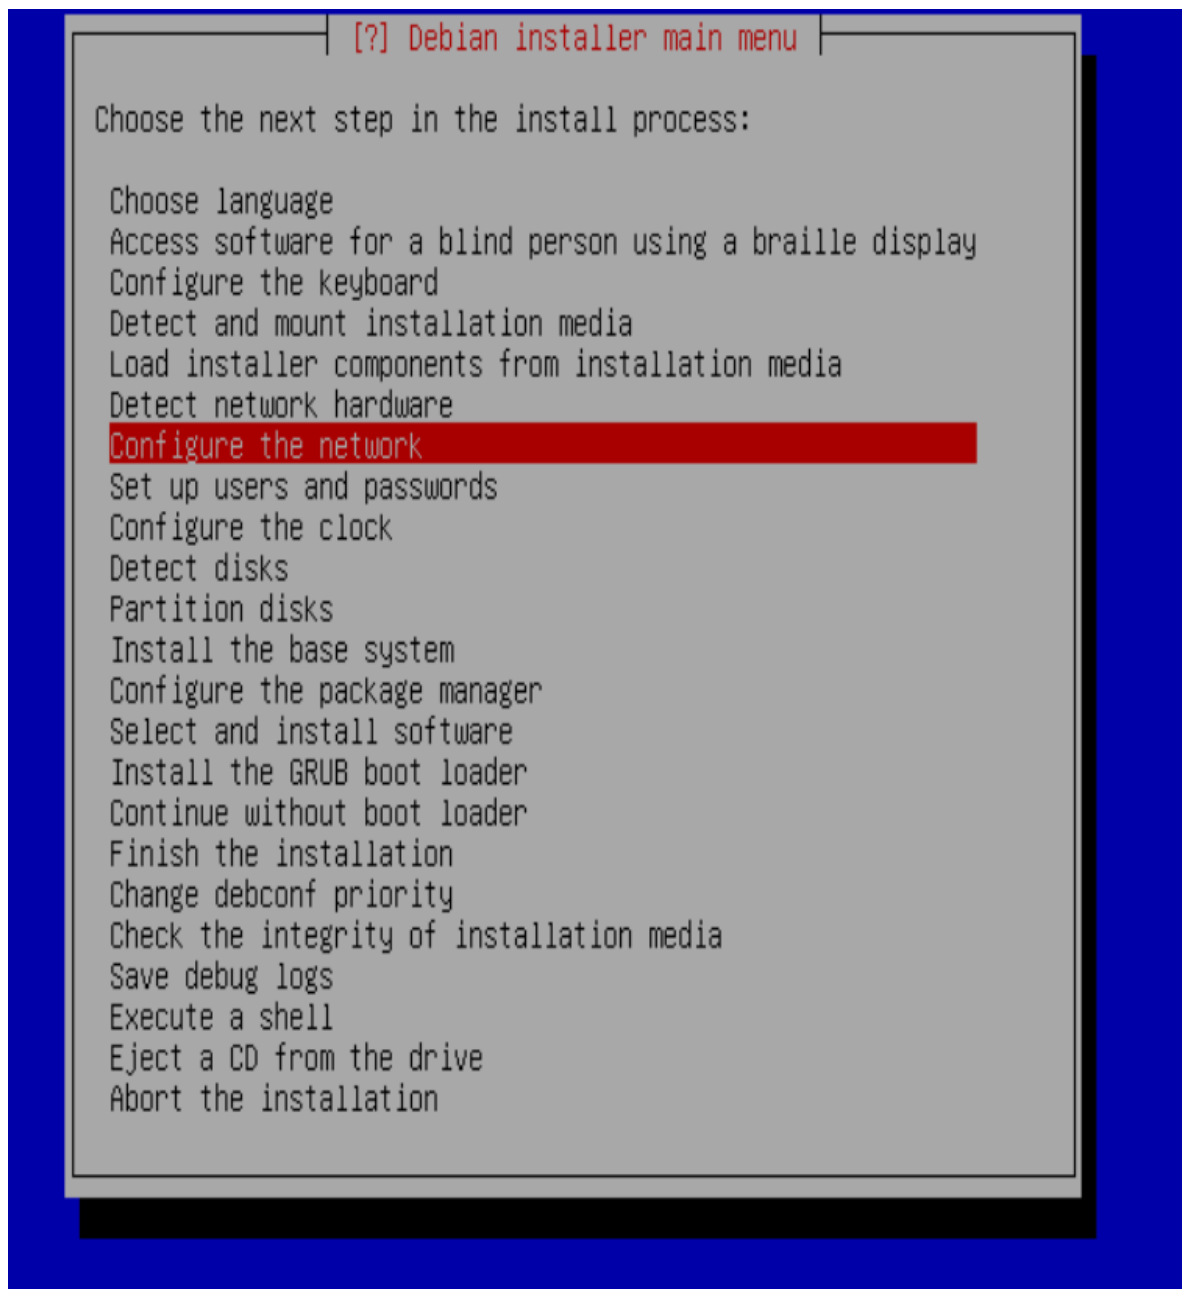

```
[ ] choose-mirror: Choose mirror to install from (menu item)
[ ] crypto-dm-modules-5.10.0-20-amd64-di: devicemapper crypto module
[ ] driver-injection-disk-detect: Detect OEM driver injection disks
[ ] espeakup-udeb: Configure the speech synthesizer voice
[ ] event-modules-5.10.0-20-amd64-di: Event support
[ ] f2fs-modules-5.10.0-20-amd64-di: f2fs filesystem support
[ ] fdisk-udeb: Manually partition a hard drive (fdisk)
[ ] fuse-modules-5.10.0-20-amd64-di: FUSE modules
[ ] load-media: Load installer components from removable media
[ ] lowmem: free memory for lowmem install
[ ] mbr-udeb: Master Boot Record for IBM-PC compatible computers
[ ] multipath-modules-5.10.0-20-amd64-di: Multipath support
[ ] nbd-modules-5.10.0-20-amd64-di: Network Block Device modules
[ ] network-console: Continue installation remotely using SSH
[ ] openssh-client-udeb: secure shell client for the Debian installer
[ ] parted-udeb: Manually partition a hard drive (parted)
[ ] ppp-modules-5.10.0-20-amd64-di: PPP drivers
[ ] ppp-udeb: Point-to-Point Protocol (PPP) - package for Debian Installer
[ ] reiserfsprogs-udeb: User-level tools for ReiserFS filesystems
```

DETECT DISK

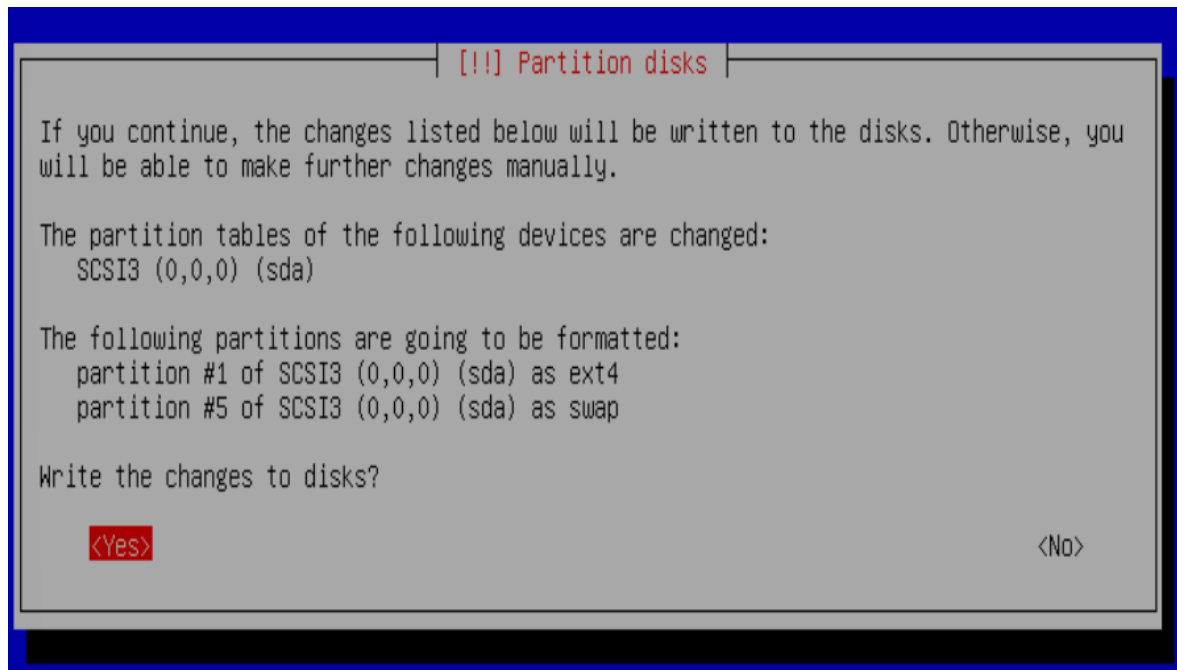

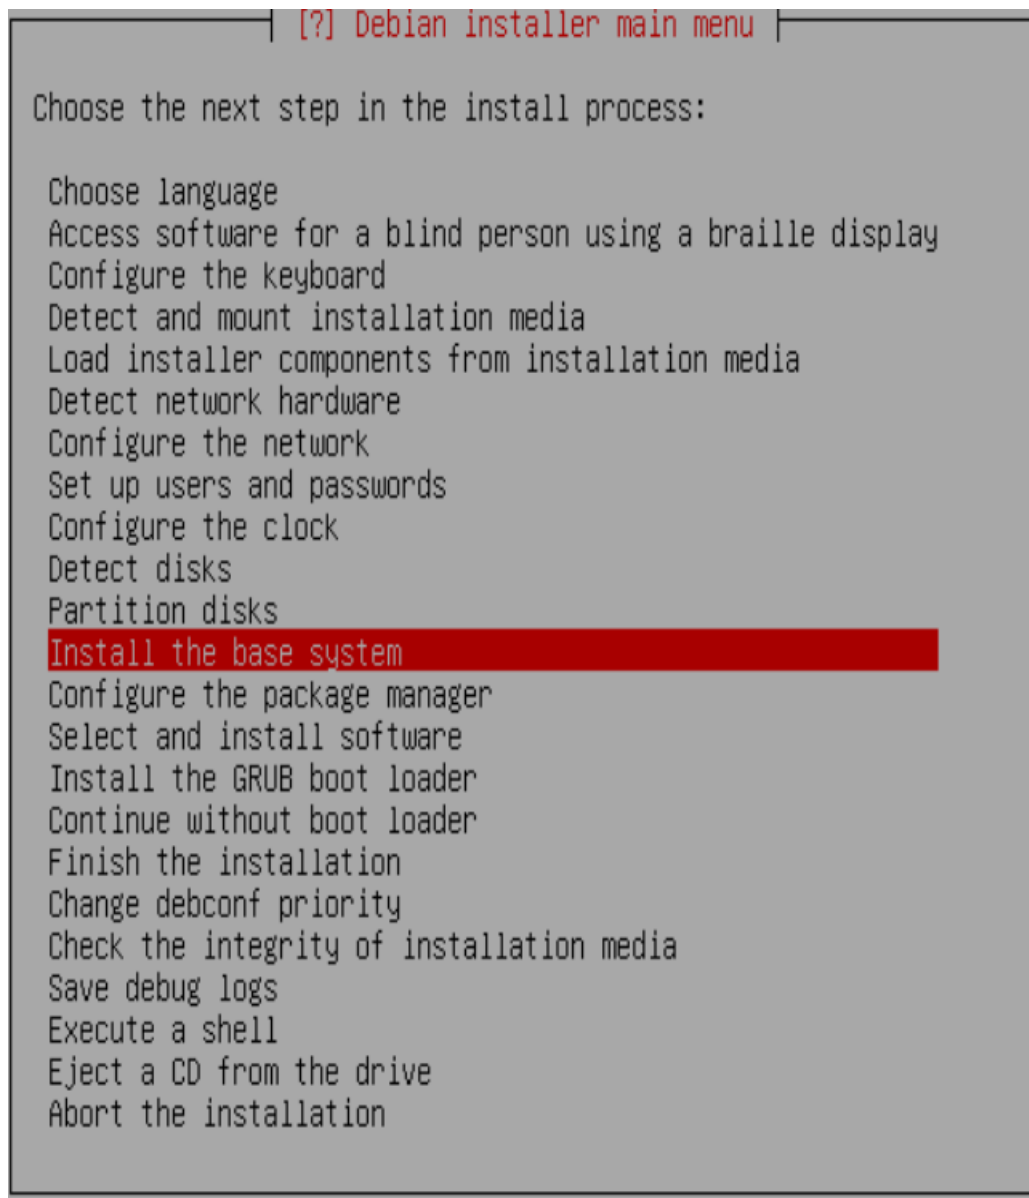

## PARTITION DISKS

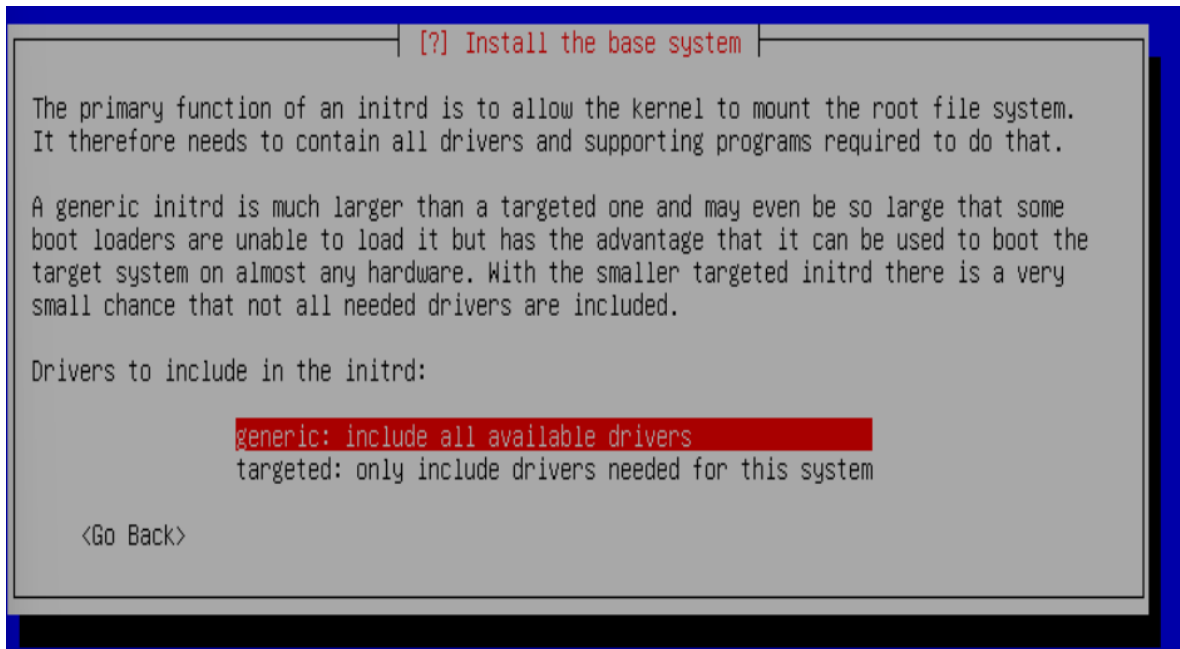

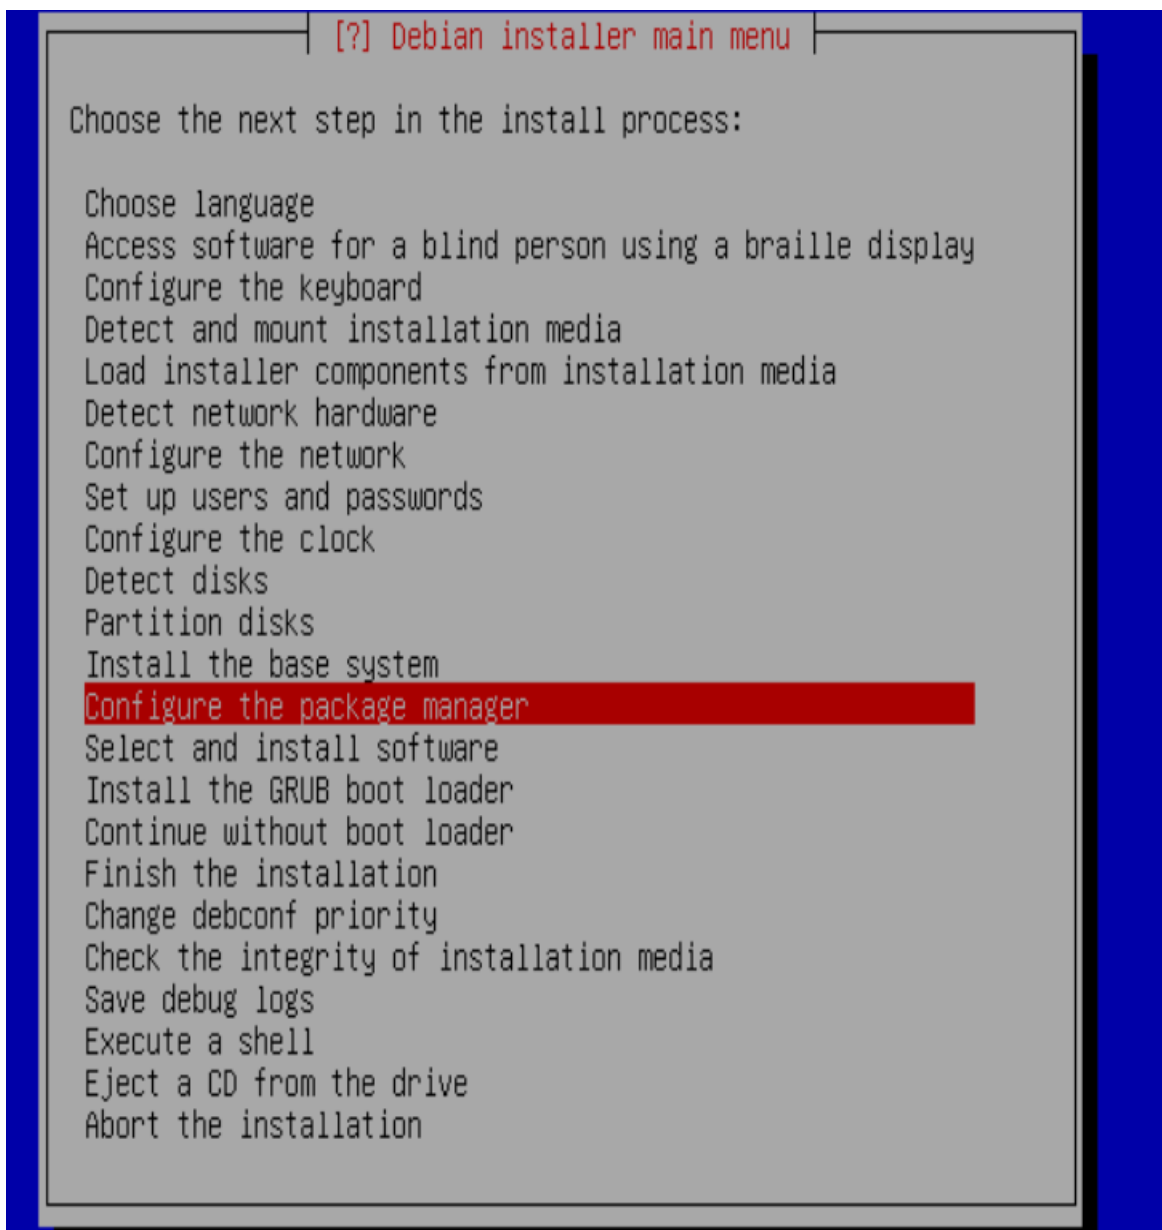

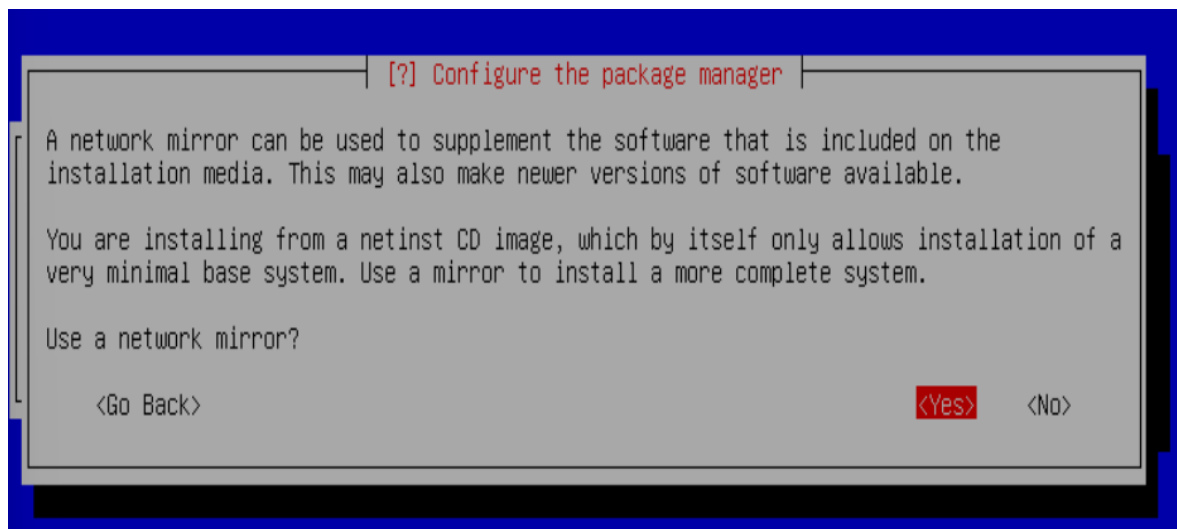

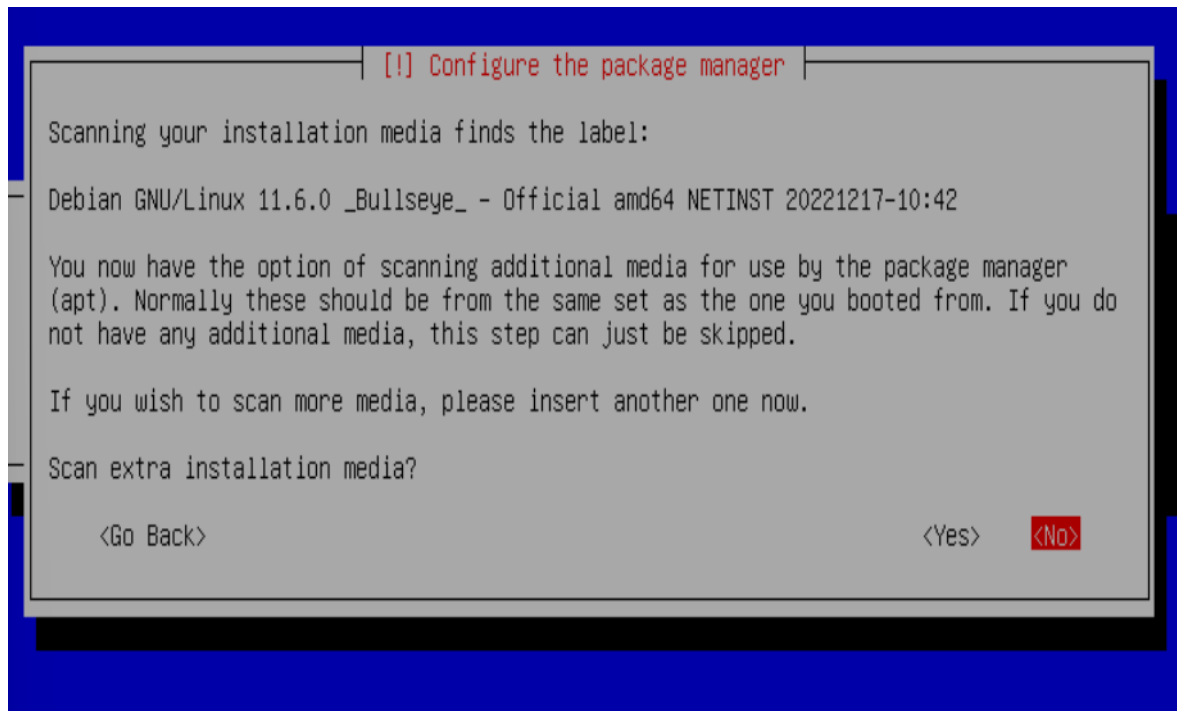

Instalar todos los drivers

Please select a Debian archive mirror. You should use a mirror in your country or region if you do not know which mirror has the best Internet connection to you.

Usually, deb.debian.org is a good choice.

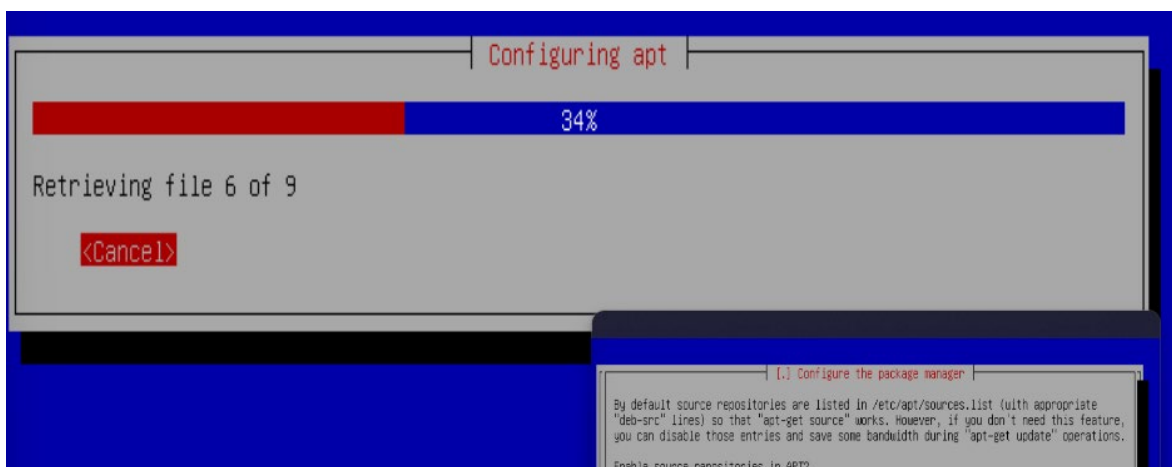

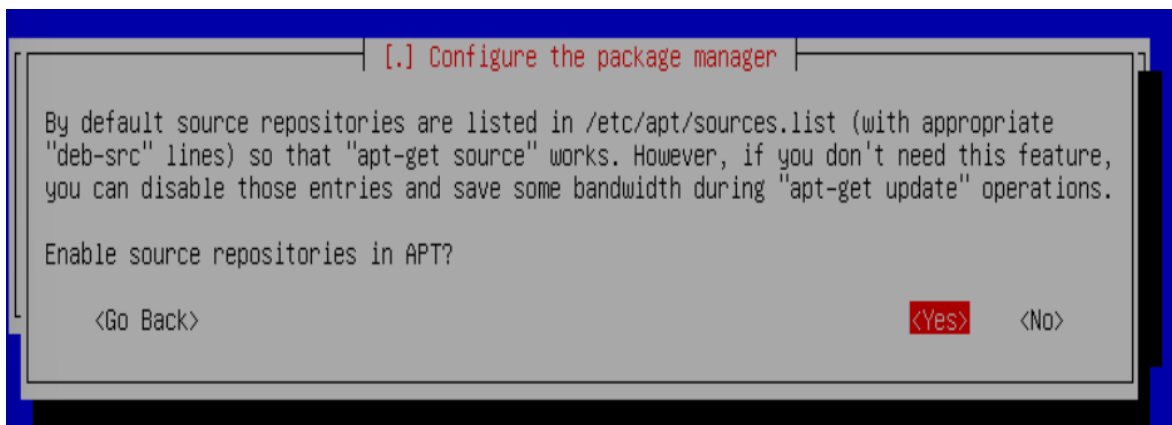

Debian archive mirror:

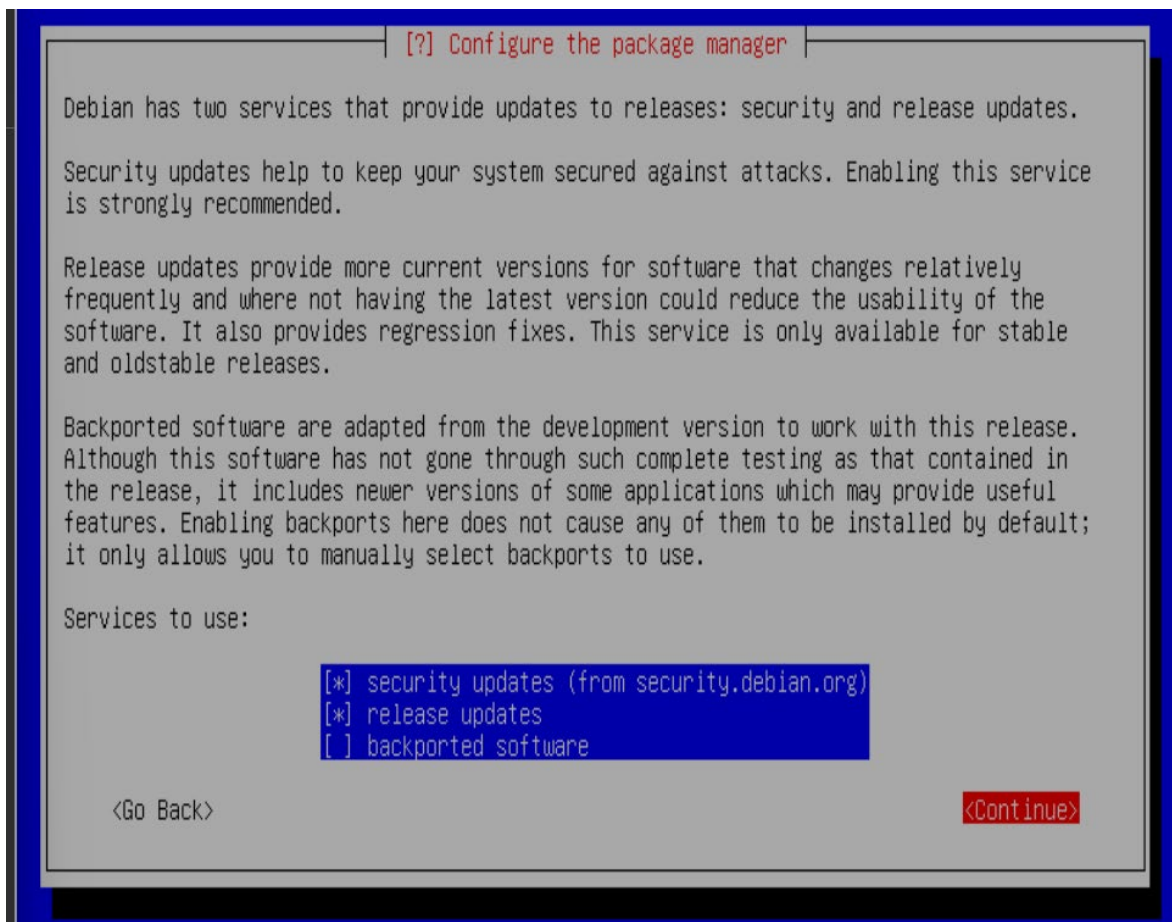

ftp.us.debian.org ↑  
debian.csail.mit.edu  
debian.osuosl.org  
debian.cc.lehigh.edu  
debian.gtisc.gatech.edu  
mirror.cc.columbia.edu  
**deb.debian.org**  
debian-archive.trafficmanager.net  
mirrors.lug.mtu.edu  
mirror.us.oneandone.net  
mirrors.bloomu.edu  
mirrors.namecheap.com  
mirrors.ocf.berkeley.edu  
debian.mirror.constant.com  
mirrors.advancedhosters.com  
mirror.cogentco.com  
mirrors.syringanetworks.net  
mirrors.gigenet.com  
mirror.us.leaseweb.net  
debian.ec.as6453.net  
mirrors.accretive-networks.net ↓

HALT

### [.] Install the GRUB boot loader

It seems that this computer is configured to boot via EFI, but maybe that configuration will not work for booting from the hard drive. Some EFI firmware implementations do not meet the EFI specification (i.e. they are buggy!) and do not support proper configuration of boot options from system hard drives.

A workaround for this problem is to install an extra copy of the EFI version of the GRUB boot loader to a fallback location, the "removable media path". Almost all EFI systems, no matter how buggy, will boot GRUB that way.

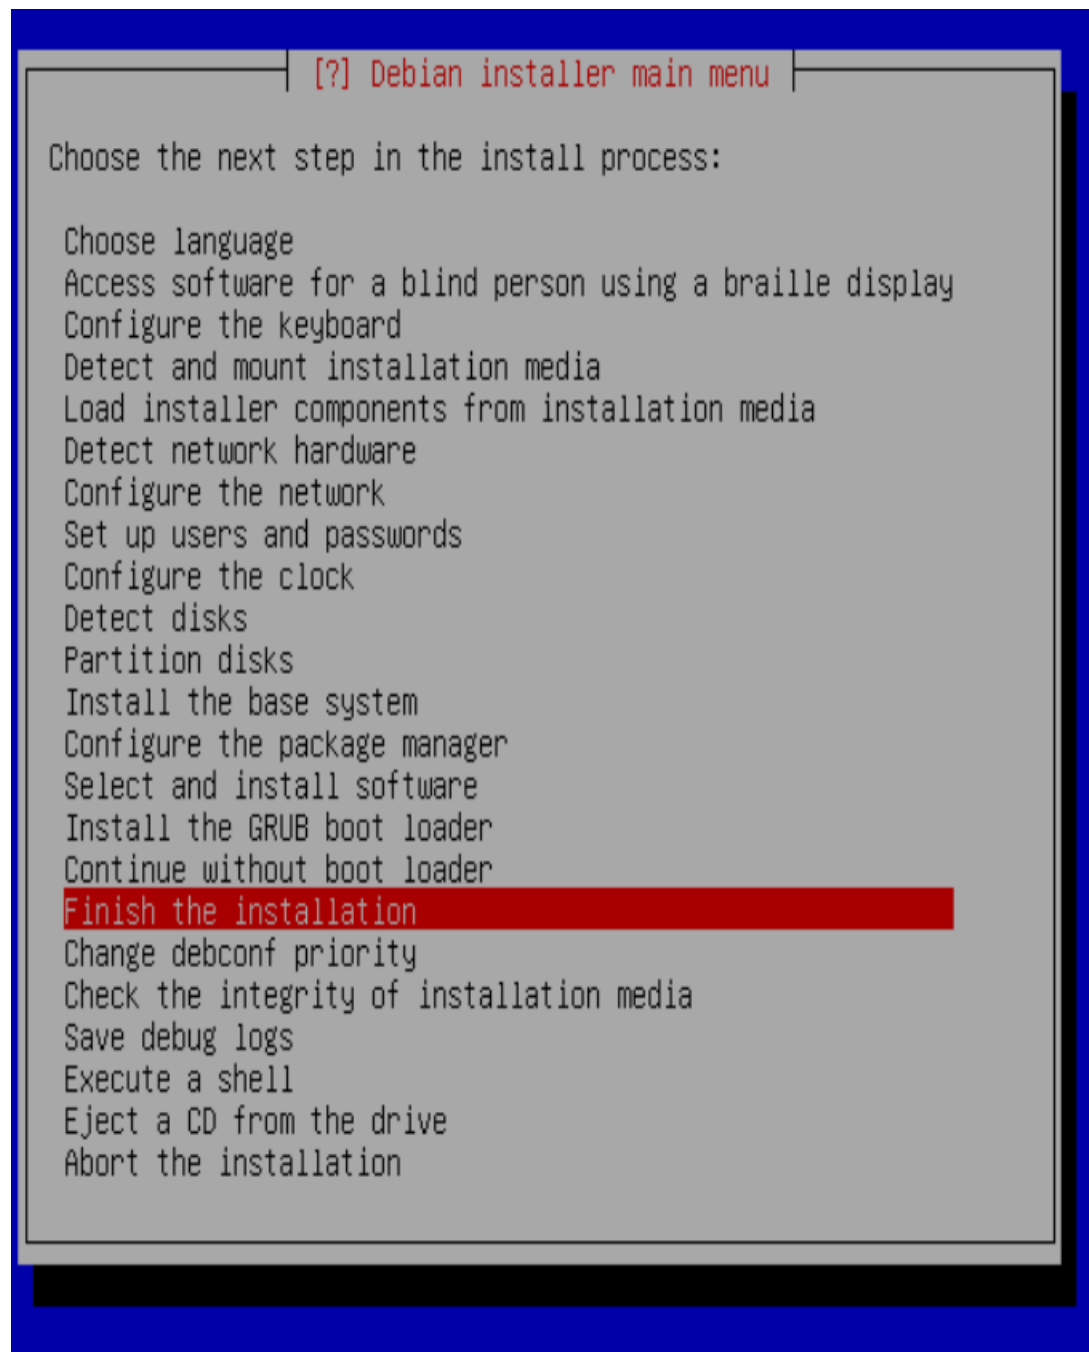

Warning: If the installer failed to detect another operating system that is present on your computer that also depends on this fallback, installing GRUB there will make that operating system temporarily unbootable. GRUB can be manually configured later to boot it if necessary.

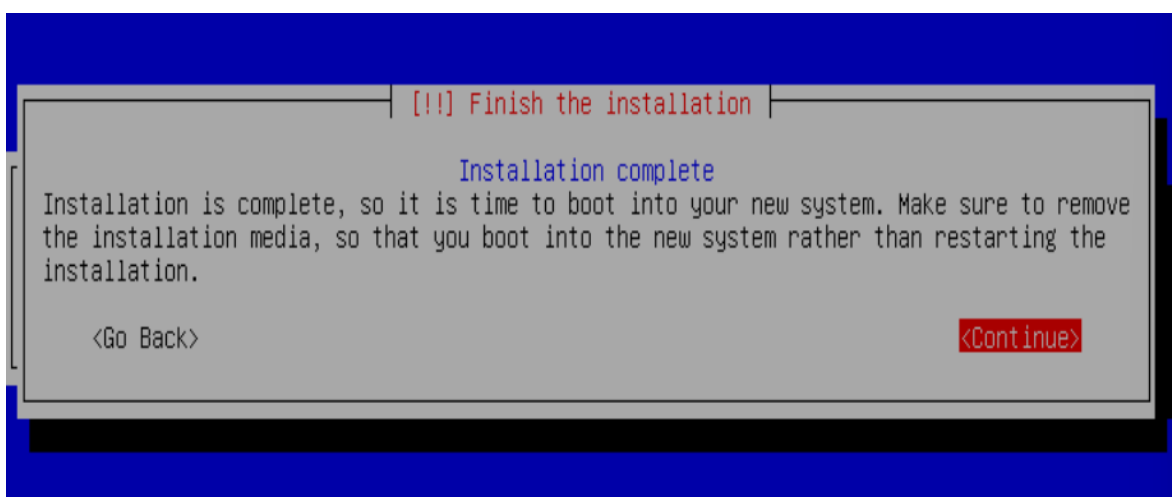

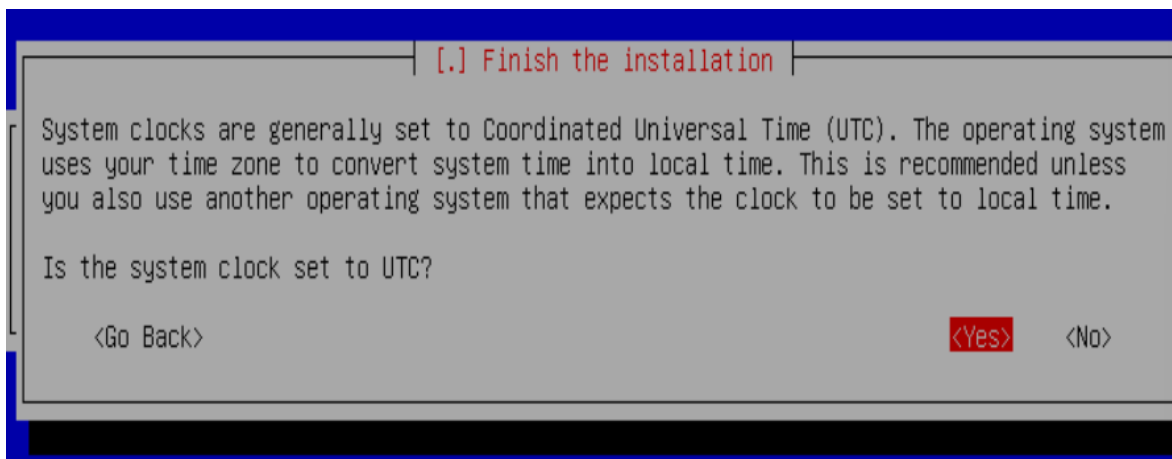

Force GRUB installation to the EFI removable media path?
